**Subject:** RE: Neuhauser LF: No further excavation needed in 2b

Thanks Joyce,

I just wanted to clarify what you mean by clean soils to be placed over the Phase 2B excavation area. Are you referring to the soils which currently exist in the clean soil staging area?

Cheers,

**Jackie Rowley**

**Subject:** Neuhauser LF: No further excavation needed in 2b

Dear Jackie – This e-mail documents our phone conversation today. After reviewing the laboratory data from the test pits in Phase 2b, I do not believe there needs to be any additional excavation in 2b under the EPA AOC. EPA will document this in a letter to Stratus to reference paragraph 27 b of the AOC which covers modifications to the Work Plan

I also do not believe there needs to be a liner placed in Phase 2b as part of the Interim Closure Plan. There will need to be some other form of Interim Closure needed for this portion of the Site as a protective measure

prior to actions taken under CDPHE, such as grading the excavation for drainage and placing a one-foot layer of clean soils over the exposed excavation.

This e-mail covers the excavation for Phase 2b only, and does not include requirements for other portions of the Site.

Please do not hesitate to contact me with any questions.
